

MERLIN A3 AUTO POP UP PRESS

How to set up your A3 press:

NB: Before setting up this press you need to remove the transit screw from the top as shown in picture.

1. Connect power lead and turn on the press with the black power switch on the right hand side of the control panel.
2. Press the SET button once, this will show the letters SP in Red and the temperature in green below. Use the up and down buttons to set the desired temperature (degrees)
3. Press the SET button once, this will show the letters ST in Red and the time in green below. Use the up and down buttons to set the desired time.
4. Now Press the SET button once more and your press is set and ready to use.

The pressure can be adjusted as required by turning the black knob on top of the heat platen.

NB: The press will automatically open when the time reaches zero (there is an audible warning from 3 seconds)

Please refer to our separate Time/Temperature guides for the correct settings for Merlin Dye-Sublimation products.
