MERLIN A4 CLAM PRESS

How to set up your A4 press:

1. Connect power lead and turn on the press with the **red** power switch on the right hand side of the control panel.
2. Press the *MODE* button once, this will show the letters *SP* in Red and the temperature in green below. Use the up and down buttons to set the desired temperature (degrees celsius)
3. Press the *MODE* button once, this will show the letters *ST* in Red and the time in green below. Use the up and down buttons to set the desired time.
4. Now Press the *MODE* button once more and your press is set and ready to use.

N.B The pressure can be adjusted as required by turning the black knob on top of the heat plate.

Please refer to our separate Time/Temperature guides for the correct settings for Merlin Dye-Sublimation products.
