

Image Trans – CL Water Slide

NB: Decorative Use only – (not dish washer proof)

April 2016

INFORMATION & INSTRUCTIONS

Water Slide will allow image transfer to objects that cannot be heated with a heat press.
This paper will work in most Oil and Non Oil Laser Copiers & Printers.
It is recommended that you do a test before commercial application.

Recommended Materials

White or Light coloured Candles, Glass, Metal, Wood & Soap

Equipment Required

Computer, Colour laser Printer / Copier, Large water bowl, washing up liquid.
Plain paper, Plastic bag or Plastic wrap

Printing

Design your image and resize if necessary
NB: Ensure your design is right reading.
Print on the white glossy coated side.
Trim the imaged Water Slide paper as close as possible without cutting into the image

Application

Fill a suitable sized bowl with water and add about 5 – 10% washing up liquid.
Place the imaged paper in bowl for 5 –10 seconds.

Slide the film onto your product
With sponge or finger, gently correct position of image and iron out air bubbles.

Let the transfer and material dry for at least an hour before handling.

Tips

For extra durability on candles, we suggest using a glue stick/gun to help adhere the Water slide transfer paper

The candle can also be heated with a blow dryer to soften the wax before applying the transfer

Storage

This paper has an indefinite shelf life when stored at room temperature. Keep away from direct heat, sunlight and humidity
